

Carbon Neutral Lucey Way, Southwark

300 Tonnes of IKO Permaphalt Waterproofing System

Project Description

In 2013 IKO PLC were asked to investigate issues at the Lucey Way Housing, Southwark, in respect of the existing access walkways that were surfaced with Mastic Asphalt, by Keepmoat and Southwark Council.

It was agreed that the Mastic Asphalt required replacing, along with screed repairs and new expansion joints. Work commenced in 2015 by Superior Roofing & Building Services Ltd and was completed by 2016.

During the works some 300 tonnes of IKO Permaphalt was installed along with IKO Enertherm MG tapered insulation boards.

A 20 year guarantee was provided giving peace of mind and long term security for the sustainability of the system.

The net carbon footprint of this project is entirely offset using internationally approved carbon credits, which means for every tonne of Mastic Asphalt made, we are helping to fund environmental and humanitarian causes.

Impact Calculator: 300 Tonnes Mastic Asphalt = 46.8 Tonnes of CO₂ Offset

Impact Sector	Impact	Quantitative Data
Environment	Wood Saved	13 tonnes
	Area Protected	0.12 hectares
Social	Number of Stoves	5
	Time Saved	336 hours
	Children Impacted	16
	Elderly People Impacted	5
	Total People Impacted	27
Economic	Working Time Saved	336 hours
	Working Days Equivalent	42 days
Health	Likely reduced cases from project support	
	Respiratory Illness (Lower Chest / Lung)	4
	Asthma	4
	Ear, Nose and Throat Irritation	1
	Total Reduced Instances of Serious Illness Attributed to Indoor Smoke	9

A Long Term, Bespoke Solution

Working in a large, active and fully populated housing estate with 3,000m² of IKO Permaphalt and IKO enertherm insulation boards to install proved challenging.

New covering including, where required, an improvement to the falls, which was achieved using our IKO enertherm MG tapered insulation boards and an asphalt surfacing covered with Spartan Porous Concrete tiles accommodated the large amount of foot traffic that would occur to the area.

This solution added an extra dimension to the final waterproofing solution.

Carbon Zero: <http://www.co2balance.com/>

The data from the Impacts are based on the field work carried out by CO2balance within the project locations in Kenya. The data that is gathered is in line with the requirements of the Gold Standard as part of the annual Monitoring. These Monitoring Reports are available on request. Data is then cross comparable against national averages in Kenya to ensure accuracy. Assumptions and extrapolations have been used

where relevant. The Health Data is derived from the following sources R. Perez-Padilla et al, 2010. 'Respiratory health effects of indoor air pollution' in International Journal of Tuberculosis and Lung Disease, vol. 14 no. 9, pp1079-1086. Kenya National Bureau of Statistics. (2008). Kenya Integrated Household Budget Survey. Ministry of Planning and National Development, p1-300. 3 Wood saved and

clean water supply - Calculations based on field measurements conducted by staff contracted to CO2balance and are conducted according to the requirements defined by the Gold Standard. Monitoring data is available on the Gold standard registry.
