

Down to Earth Centre, Little Bryn Gwyn

390m² New BUFR constructed to BREEAM rating 'Excellent'

Project Description

The Down to Earth Training Centre, built almost exclusively with natural and locally sourced materials required an anti-root roofing system, ready for the install of a green roof.

Solution

It was also very important that local and UK manufactures were chosen for this project due to its traditional build and green credentials. The three circular tiers were to be covered with an IKO Anti-Root Torch-On Cap Sheet to meet both requirements.

Installation

Due to the unusual roof formation, the installation of the cap sheet proved a challenge that was overcome with great success. Perimeter edges, insulated kerbs, gutters and up-stand details were installed with Anti-Root Torch-On Detailing Flashings. The perimeter edge outlets were also fitted with leaf guards.

Contractors: Roofing Technologies LTD

Product / Systems

- IKO Challenger 180 Underlay
- IKO Systems T-O VCL
- IKO Systems S-A Underlay
- IKO Systems T-O Underlay
- IKO Anti-Root Cap Sheet
- IKO enertherm ALU 160mm Insulation Board
- IKO Insulated Kerbs
