

# Northcott Theatre, University of Exeter

550m<sup>2</sup> Existing Building Roof Refurbishment

## Project Description

Refurbishment of the 464 seat Northcott Theatre roof (est 1967) at the University of Exeter with completion required during the summer holiday period.

## Solution

The site situation made the building vulnerable to high winds, so a low maintenance solution including a long-term single point warranty was required.

## Installation

The roof refurbishment included the installation of smoke vents, associated smoke control panels and accessories. The scheme also required design support on the upstands, parapets, edge details, internal rainwater outlets and pipe penetration challenges.

**Contractors:** Stormforce Roofing

**Architect:** WS Atkins (Global)
