

High Performance Flat Roofing for today and the future.

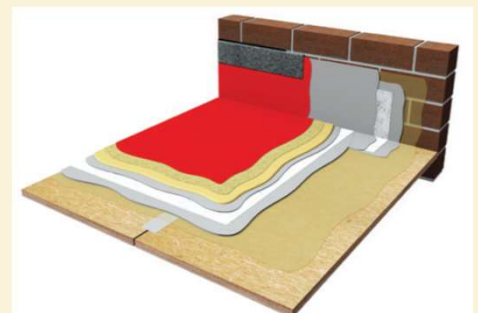

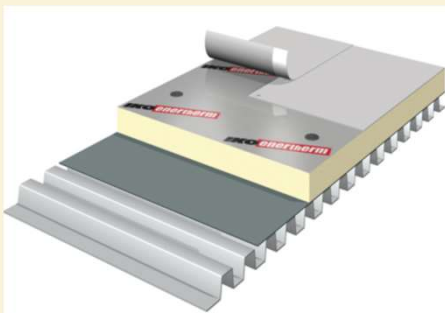

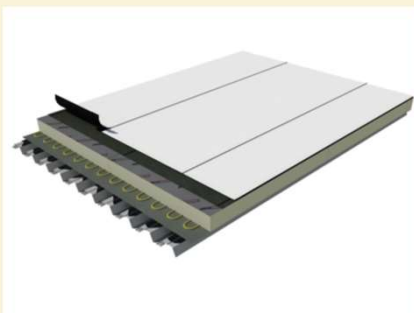

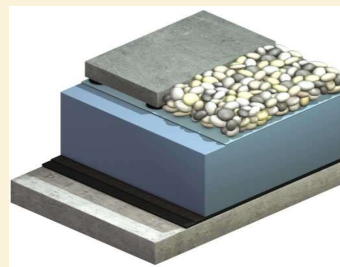

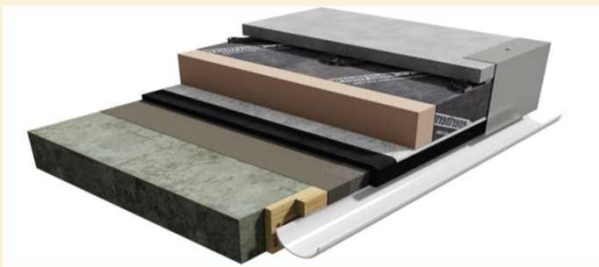

IKO are happy to present a new CDP that will cover design considerations for the following Waterproofing System Solutions for Flat Roofing;

- Cold Applied Liquid Systems
- BUR Felt Systems
- Single Ply Systems
- Asphalt
- Hot Melt Systems

IKO Ireland is part of the IKO Group of Companies, a Worldwide enterprise established in 1951 with 3,500 employees and more than 25 manufacturing plants in North America and across Europe. IKO Manufacture and Distribute Roofing, Waterproofing and Insulation solutions to more than 96 countries around the globe. IKO's continued investment ensures that we can provide you with roofing and waterproofing solutions that meet increasingly stringent performance and design requirements.

This CPD presentation delivers a comprehensive overview of traditional flat roof waterproofing methods of today and their associated components. It Introduces the latest flat roofing technologies, designed to meet the needs of modern construction, giving guidance on sustainability, including details on good and bad practise.
