

HIGH PERFORMANCE FLAT ROOFING BITUMINOUS MEMBRANES

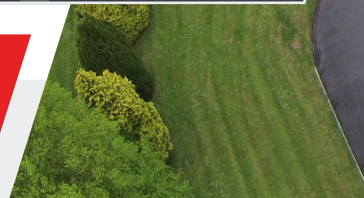

This seminar will introduce surveyors, architects and specifiers to the benefits of bituminous membrane waterproofing systems.

Introducing the roof types, specification options, design considerations, environmental developments and support services on offer.

Also included:

- Traditional and modern waterproofing methods
- Common failure causes
- Essential design considerations
- Insulation options
- ESG & sustainability

IKO are happy to offer you CPD training and product presentations. The session format can be flexible.

We can do on site at your premises or remote video presentation (Teams/Zoom etc) and you will have ample time to have a Q&A discussion.
